4. *IS THIS ITEM BUDGETED (IF APPLICABLE)*

YES ☐ **NO** ☐ **N/A X**

Mr. Muirhead is requesting a variance for the properties of 4819 and 4821 South Lakewood Drive.

AGENDA ITEM #2

CITY OF PARKER

PETITION FOR VARIANCE APPLICATION

Date of application: 6/22/23 Application No: _____

Petitioner's Name: Fox Monroe Homes LLC - Jake Muirhead, Owner
(Current owner of property must apply for the variance)

Address: 4407 Conifer Lane

City, State, Zip: Panama City FL 32404

Telephone Number: 850 851 9767 Fax Number: ---

Email: FoxMonroe@icloud.com

Parcel Identification Number(s). (Obtain from Property Appraiser's Office:

25077-030-000

Legal Description: Lakewood 119A2 W1/2 of Lot 12 BLK 12 ORB 4632 P 583

Description of Proposed Variance: Requesting deviation from FFE of (1) One foot above crown of road (S Lakewood Dr)

Location of Variance Property: 4819 S Lakewood Dr Parker, FL 32404

Surveyor's Name: Poly Surveying of Mobile, Inc

Address: 5588 Jackson Road

City, State, Zip: Mobile AL 36619

Telephone Number: 251-666-2010 Fax Number: _____

Email: maile@polysurveying.com

CITY OF PARKER VARIANCE APPLICATION

SUBMITTAL CHECKLIST

SUBMITTALS FOR THE PETITION FOR VARIANCE-Packets will include:

If any submittals do not meet these requirements, they will not be accepted

1- Original plus two {2} copies of the variance application.

2- Enclose Application Fee: $ 150.00 {non-refundable regardless of decision by the City}. Check should be made payable to "City of Parker".

3- Three {3} copies of the site plan. The plan must include a north arrow, a scale and show setbacks of all existing structures and all proposed structures from all property lines. If the proposed variance is requested for a gulf front lot, you will need to have a surveyor show the Shoreline Protection Zone and the FDEP Control Line on your site plan.

4- Three {3} copies of numbered photographs in color of the proposed site location of view written on back of each photograph, corresponding numbers to be shown on a site plan of the photography locations.

CITY OF PARKER VARIANCE APPLICATION

VARIANCE REQUEST QUESTIONNAIRE

1. There are extreme practical or economic difficulties in carrying out the strict letter of the Land Development Regulations. X YES ____NO Please explain below

There are extreme practical difficulties. The lot slopes naturally from S Lakewood Dr to Martin Lake. Bringing FFE to 1 foot above crown of road will cause problems with storm water runoff to adjacent residences + to Martin Lake.

2. The variance request is not based predominately upon a desire to reduce the cost of developing the site. X YES ____NO Please explain below

Variance request is NOT based on this; it is based on keeping grade consistent with existing residences on either side of conjoined lots at 4819 + 4821 S Lakewood

3. The proposed variance will not substantially increase congestion on surrounding public roadways, the danger of fire, or another hazard to the public. X YES ____NO Please explain below.

Proposed variance will NOT cause issues stated above. The intent is to keep harmony with adjacent lots/residences.

4. The proposed variance will not substantially diminish property values in, nor alter essential character of, the surrounding site X YES ____NO Please explain below.

Variance will NOT diminish property values or alter essential character of surrounding sites; it will prevent unnecessary storm water runoff causing issues with adjacent residences

5. The effect of the proposed variance is in harmony with the general intent of these Land Development Regulations and the specific intent of the relevant subject area(s) of these Regulations. X YES ____NO Please explain below

Correct. Construction of single family residence will be in flood zone "X", further negating, in conjunction with natural slope of land, the need for FFE to be (1) one foot above crown of road.

6. The effect of the proposed variance is consistent with the purposes of the Regulations

Response: Yes, the proposed variance is consistent with the purposes of the regulations. This proposal conforms to the LDR and poses no issues/problems against the LDR as outlined in engineered letter from KB engineering.

7. The effect of the proposed variance is consistent with the Comprehensive Plan.

Response: Yes, the proposed variance is consistent with the Comprehensive plan. *2040 Comprehensive Plan; Policy 3.1.4: The City will include in its Land Development Regulations standards to protect and stabilize established residential neighborhoods. Such measures and standards shall address mitigation of impacts from adjacent land uses,...* The proposed variance will minimize the impact to adjacent lots.

CITY OF PARKER VARIANCE APPLICATION

NOTIFICATION TO AFFECTED PROPERTY OWNERS

The applicant agrees that the City has the right to post a notification sign on the property, visible from the roadway, identifying the date, time, and location of the meeting of the City Council to consider the variance application. The applicant agrees to ensure that the sign is continually posted on the property until after a final decision of the City Council on the variance request or the application is withdrawn. After the meeting, the City shall have the right to remove the sign, restoring the surfaces of the property to its former natural state.

REQUIRED SIGNATURE

I have read and understand all information provided in this application, the requirements listed within the application and agree to provide the necessary information requested by the City of Parker. The information I have provided on this application is true and correct to the best of my knowledge.

I understand that this application will be heard in a public meeting by the City of Parker City Council, the Parker Land Development Code shall govern the procedure of the decision.

I understand the Parker City Council cannot issue variances for the requirements of the City of Parker Comprehensive Plan. Changes to the Comprehensive Plan require a submittal of a Comprehensive Plan amendment application. (Applications are available at the City of Parker.)

I understand the City Council shall not vary the requirements of any provision of Ordinance 90-177, Parker Comprehensive Planning and Land Development Regulation Code, unless it makes a positive finding, based on substantial competent evidence on each of the finds contained in he variance application.

PROJECT:

4819 S. Lakewood Road
Finished Floor Elevation Review

PROJECT NARRATIVE:

On behalf of Fox Monroe Homes, LLC, please find enclosed the review of the finished floor elevation for the proposed home to be located at 4819 S. Lakewood Road. Per the City of Parker ordinance, a structures FFE shall be one (1) foot above the elevation of the nearest roadway crown. While this is easily applicable for a new subdivision development due to the overall design providing for elevated lots to support this FFE elevation; this is not always practical for previously platted lots where the grading may not support such an elevated FFE. Such is the case for 4819 S. Lakewood Road. Per available GIS data, this lot has a steady decline in grade of elevation 27.0 at the roadway and down to elevation 4.0 at Martin Lake. Based on review of the FEMA 100-year flood plain for this location, the 100-year flood elevation for this property was found to be at elevation 9.0. Given that the proposed structure is to be built outside of the FEMA 100-year floodplain and above elevation 9.0, the structure would not be at high risk level for flooding per FEMA's criteria. On lot grading is also to be implemented to assure that onsite runoff is diverted away from the proposed structure and thence towards Martin Lake.

It is my professional opinion that the construction of the proposed structures FFE beneath the roadway crown elevation and higher than the designated FEMA 100-year flood elevation will not adversely affect nor cause flooding to the structure – should the on-lot grading be implemented appropriately. It is recommended that the FFE for this structure be at an elevation equivalent to that of the other homes along this roadway that are waterfront to Martin Lake.

If there is any further information needed, please let me know.

TO:

Jake Muirhead
Fox Monroe Homes, LLC
4407 Conifer Lane
Panama City, FL 32404

PROJECT:

4821 S. Lakewood Road
Finished Floor Elevation Review

PROJECT NARRATIVE:

On behalf of Fox Monroe Homes, LLC, please find enclosed the review of the finished floor elevation for the proposed home to be located at 4821 S. Lakewood Road. Per the City of Parker ordinance, a structures FFE shall be one (1) foot above the elevation of the nearest roadway crown. While this is easily applicable for a new subdivision development due to the overall design providing for elevated lots to support this FFE elevation; this is not always practical for previously platted lots where the grading may not support such an elevated FFE. Such is the case for 4821 S. Lakewood Road. Per available GIS data, this lot has a steady decline in grade of elevation 27.0 at the roadway and down to elevation 4.0 at Martin Lake. Based on review of the FEMA 100-year flood plain for this location, the 100-year flood elevation for this property was found to be at elevation 9.0. Given that the proposed structure is to be built outside of the FEMA 100-year floodplain and above elevation 9.0, the structure would not be at high risk level for flooding per FEMA's criteria. On lot grading is also to be implemented to assure that onsite runoff is diverted away from the proposed structure and thence towards Martin Lake.

It is my professional opinion that the construction of the proposed structures FFE beneath the roadway crown elevation and higher than the designated FEMA 100-year flood elevation will not adversely affect nor cause flooding to the structure – should the on-lot grading be implemented appropriately. It is recommended that the FFE for this structure be at an elevation equivalent to that of the other homes along this roadway that are waterfront to Martin Lake.

If there is any further information needed, please let me know.
